

Dear B-128 Owner,

Congratulations on your purchase of the Commodore B-128 computer system. We are sure that you will enjoy your new computer. To help you to begin to realize the capabilities and understand the operation of the B-128 we have included in this package a FREE Basic Tutor. The Basic Tutor is designed to give you an introduction to the Basic language and the B-128. To load the program enter:

DLOAD"*" press [RETURN]

Enter RUN press [RETURN]

The program will then begin to display on the screen. Enjoy your new system and Basic Tutor brought to you compliments of Protecto Enterprizes.

(Remember to mark your pink order sheet with the correct key number)

Commodore B128 User's Group

You are invited to join with your fellow B128 owners to form a user support organization for the B128 owner. We are now accepting applications for founding memberships. Our plans include a monthly newsletter to be published starting 1 December 1984, a public domain software library with initial disk releases in late December, and a B128 oriented bulletin board system in the first quarter of 1985. You can help make these plans a reality by signing up, and participating actively in the group.

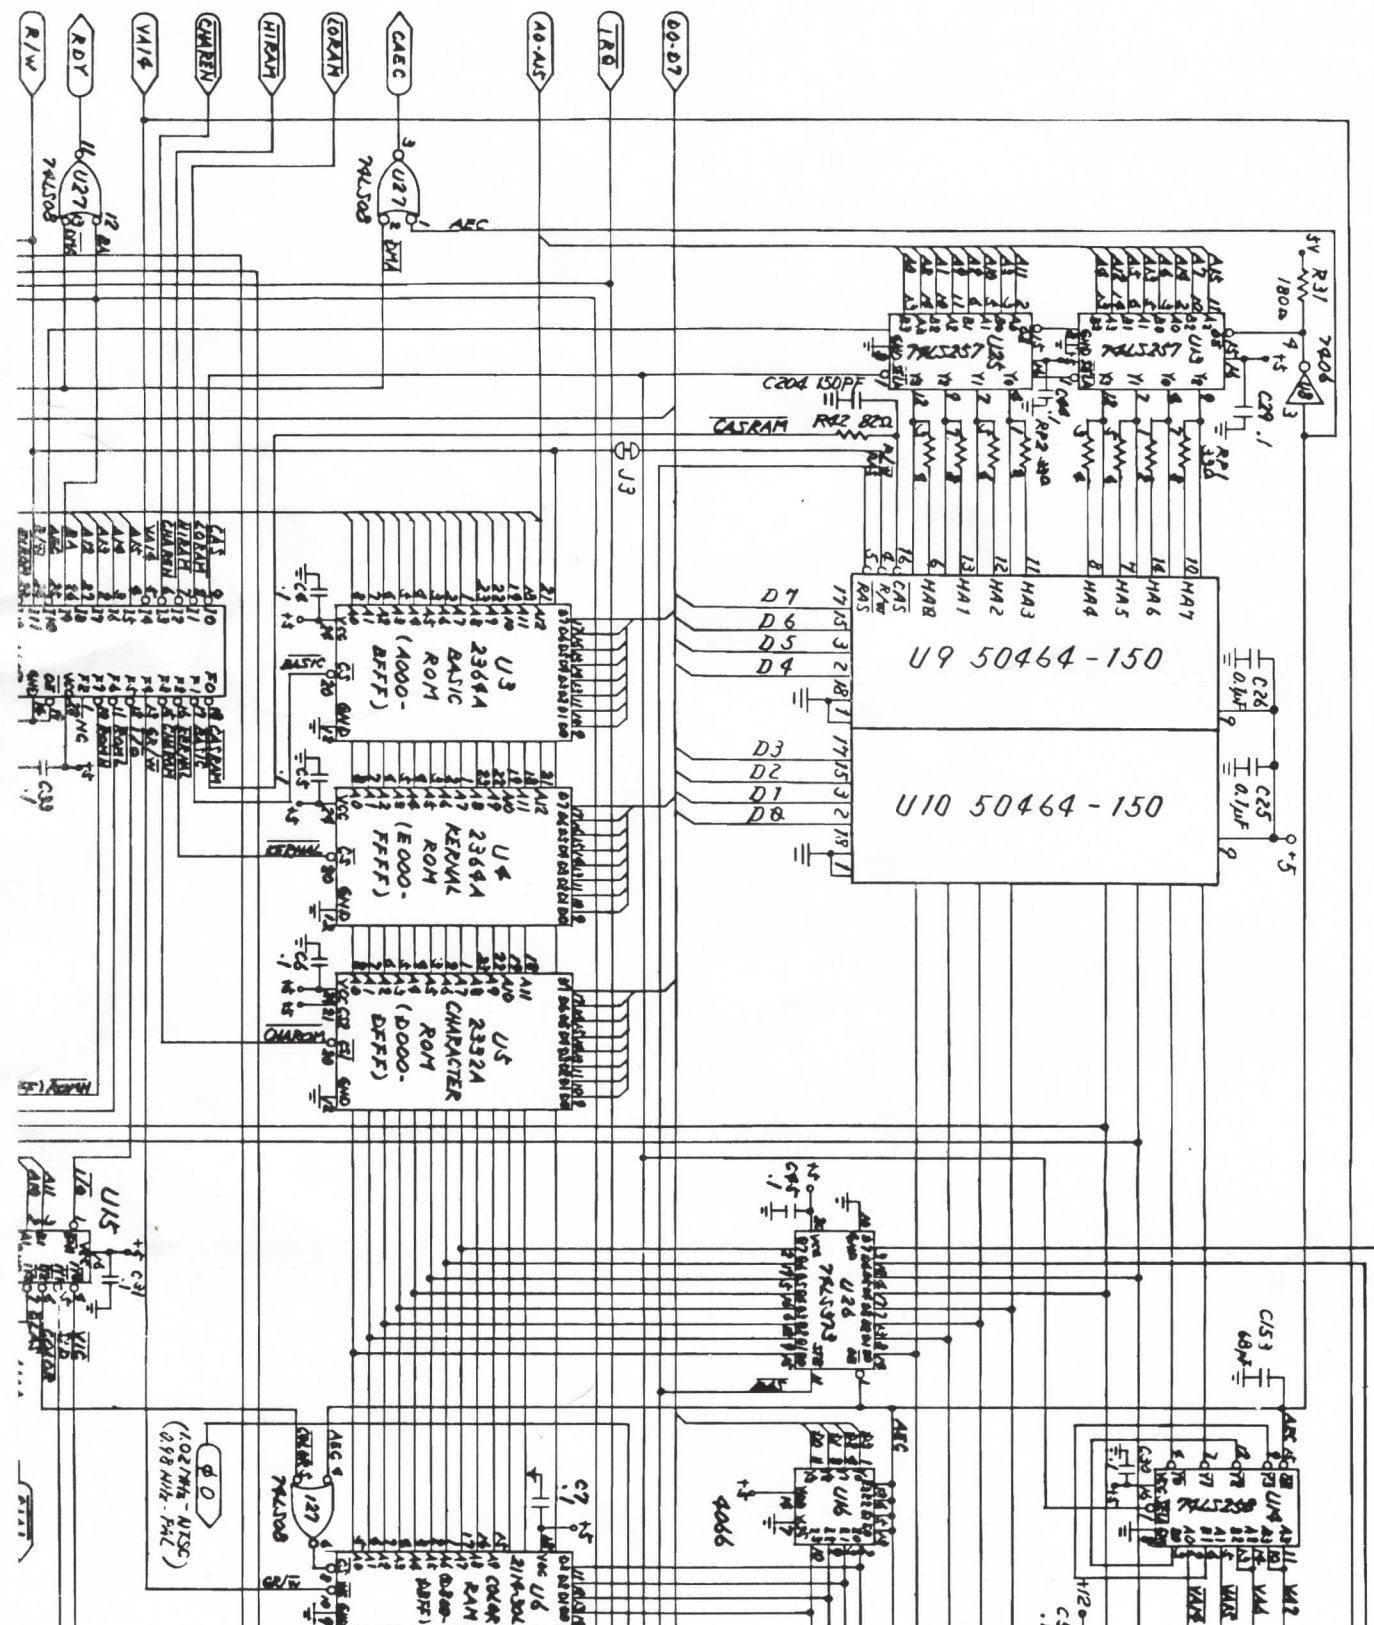

The value of your B128 computer depends on the resources available to you that make it useful, a user's group is one way that we can all help each other get more out our machines. Since there aren't a great number of B128 systems in the United States, we can't count on a large amount of vendor support. While Protecto Enterprises intends to support the system, there is only so much one company can do. Much of the rest is going to have to come from us the users. Working together each of us will have more available to us then any one of us could provide ourselves alone.

Membership in the group will include subscription to the newsletter, access to the software library (each disk in the library will cost \$5.00 to cover media, documentation, and mailing costs), and access to the bulletin board system when established. Dues are \$20.00 per year. Please fill out the application below and send it to the address below with a check or money order.

B128 User's Group

COMODORE B128 COMPUTER SYSTEM

- 1) B128 , 128K COMPUTER
- 2) 8050 DUAL DISK DRIVE
- 3) 4023 100CPS , 80 COLUMN BIDIRECTIONAL PRINTER
- 4) 12" HI-RESOLUTION, LSI MONITOR (AMBER)
- 5) MONITOR CABLE

8050 DUAL DISK DRIVE , TANDON

Later version (door switch activated drive motor)

For proper seating of disk press door down
firmly in a smooth motion

TO LOAD A DISK IN THE COMPUTER

Type dload "*" and press return key

Type directory to see names of files in disk

Type dload "filename" and then type RUN to execute program
(default values Q drive, device # 8)
(primary adress)

Before a new disk can be used, it has to be formatted
Insert in drive 0 or 1

Type Command HEADER

EXPL. HEADER "LETTERS", D1, I01

Formats a disk named LETTERS in drive 1
and gives it the ID # 01

PRINTER

OPEN 4,4: CMD 4: LIST ----- Prints program on printer
After printing is completed type

PRINT #4: CLOSE 4

type this first
LOAD "\$0", 8
then wait until it is loaded
then type
OPEN 4,4: CMD 4: LIST ... PRINT #4: CLOSE 4.
Type this after printing
] -- ~~prints~~ Lists directory of drive 0 to the printer

DISK DRIVE

COPY d1, "file a" to d0, "*"] -- Copies "file a" from drive 1 to drive 0 and gives it the same name

To LOAD a program DLOAD "program name" then RUN
if program is not in Basic you can have trouble
So after dload say LIST to see if it is Basic
(instead of RUN)
